Sheena Master's Thesis Theme Documentation

Info

Sheena's theme is a single page layout Drupal theme based on the Skeleton and BlueMasters template published by Smashing Magazine.

Features

- Responsive layout(7.x-2.x)
- Sheena theme is available at https://github.com/sheenasheen/parallax
- Includes Flexslider as an alternative to a background image
- A total of 22 content areas and 8 sections in the navigation

Installation

Install Sheena theme the same way you install any modern drupal theme you can read full documentation on installation here

Basics

How to change the logo

While logged into the site as an administrator, in the top menu bar select Appearance-> And Settings for the selected theme. Scroll to Logo image settings and upload a new image

LOGO IMAGE SETTINGS

If toggled on, the following logo will be displayed.

☐ Use the default logo

Check here if you want the theme to use the logo supplied with it.

Path to custom logo

logo_0_0.png

The path to the file you would like to use as your logo file instead of the default logo.

Upload logo image

[Choose File] No file chosen

If you don't have direct file access to the server, use this field to upload your logo.

Change the Favicon

While logged into the site as an administrator, in the top menu bar select Appearance-> And Settings for the selected theme. Scroll to Short Icon settings and upload a .ico file
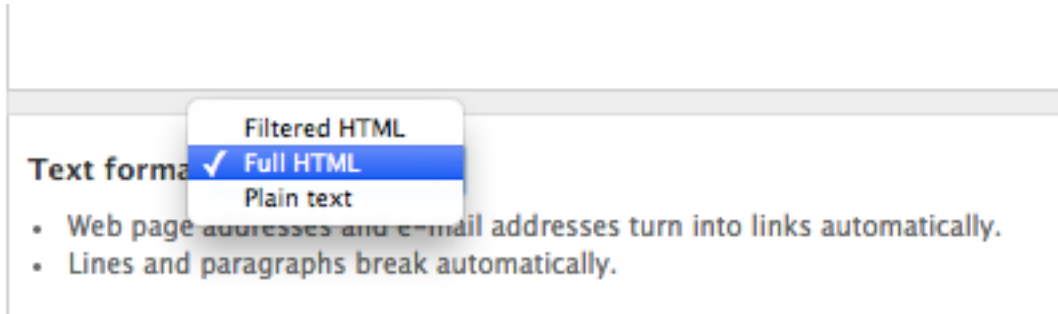

SHORTCUT ICON SETTINGS

Your shortcut icon, or 'favicon', is displayed in the address bar and bookmarks of most browsers.

☑ Use the default shortcut icon.

Check here if you want the theme to use the default shortcut icon.

Using Shortcodes

In order to use the shortcodes included in the skin (ensure that you have installed the included blocks module and that it is enabled) go to structure-> block -> add block. Inside the text editor paste in and modify the html to fit your needs.

```
Block body *
<div class="hi-icon-wrap hi-icon-effect-6">

                <a href="#set-6" class="hi-icon hi-icon-contract">Contract</a>

        </div>
<h3>Lorem</h3>
        <p> Lorem ipsum dolor sit amet, consectetur adipisicing elit.</p>
```

Then select the Text format and ensure that Full HTML is selected

```
                    Filtered HTML
Text form✓  Full HTML
                    Plain text
  •  Web page addresses and e-mail addresses turn into links automatically.
  •  Lines and paragraphs break automatically.
```

and that you specify the region that you want the block to display in.

REGION SETTINGS

Specify in which themes and regions this block is displayed.

Sheena A Thesis Project (default theme)
- None -

Seven (administration theme)

Shortcodes Available

Services Icon Hovers:

To Achieve these hovers modify the following shortcode :

<div class="hi-icon-wrap hi-icon-effect-6">
        Contact </div>

Other Included Icons:

Row 1:
- `hi-icon hi-icon-support`
- `hi-icon hi-icon-locked`
- `hi-icon hi-icon-earth`
- `hi-icon hi-icon-cog`
- `hi-icon hi-icon-clock`

Row 2:
- `hi-icon hi-icon-videos`

- hi-icon hi-icon-list
- hi-icon hi-icon-refresh
- hi-icon hi-icon-images
- hi-icon hi-icon-mobile

Row 3:
- hi-icon hi-icon-screen
- hi-icon hi-icon-pencil
- hi-icon hi-icon-link
- hi-icon hi-icon-mail
- hi-icon hi-icon-location

Row 4:
- hi-icon hi-icon-archive
- hi-icon hi-icon-chat
- hi-icon hi-icon-bookmark
- hi-icon hi-icon-user
- hi-icon hi-icon-contract

Row 5:
- hi-icon hi-icon-star

Portfolio Image Lomo Vingette Effect

Black:

```
<div class="lomo_black">
    <img src="/sites/all/themes/bluemasters%207/img/Wave-1.jpg" alt="" />
  </div>
```

White:
```
  <div class="lomo_white">
    <img src="/sites/all/themes/bluemasters%207/img/img09.jpg" alt="" />
  </div>
```

Natural Language Form

```html
<body data-0="background-position:0px 0px;" data-100000="background-position:0px -50000px;">
        <div id="skrollr-body">
<form id="nl-form" class="nl-form">
                                OMG! I think your work is <select>
                                        <option value="1" selected>choose adjective</option>

                                        <option value="2">Fantastic</option>
                                        <option value="3">Awesome</option>
                                        <option value="4">the best ever</option>

                                        <option value="2">meh.. it was ok</option></select> please talk to me via <select>
                                        <option value="1" selected>contact</option>

                                        <option value="2">call</option>
                                        <option value="3">email</option>
                                        <option value="4">snail mail</option>
                                        <option value="2">messager pigeon</option>
                                </select>
                                me at <input type="text" value="" placeholder="contact info"/> by the way my name is <input type="text" value="" placeholder="(best name ever)" />
                                <div class="nl-submit-wrap">
                                        <button class="nl-submit" type="submit">Send!</button>
                                </div>

                        </form>
                </div>
            </div>

    </div>
        </div>
```

Content Layouts

Two Columns Layout

```
<div id='root'>

        <div class='box' id='leftquater'>...</div>

        <div class='box' id='middleleftquater'>...</div>

        <div class='box' id='middlerightquater'>...</div>

        <div class='box' id='rightquater'>...</div>
</div>
```

Changing the Menu Item Names
Go to your Drupal Install and go to Sites-> All -> Themes -> Bluemasters 7 -> page--front.tpl.php (WARNING YOU WILL NEED A TEXT EDITOR TO PROPERLY IMPLEMENT THESE CHANGES) Find the section with the div id ="Navigation" and change the items highlighted below to whatever you want your section names to be

```
<div class="grid_7">
    <!--navigation-->
    <div id="navigation">
        <?php print drupal_render($page['navigation']); ?>
        <ul id="mmnav Navitems">
            <li><a href="#Services">Services</a></li>
            <li><a href="#Portfolio">Portfolio</a></li>
            <li><a href="#Extra">Extra</a></li>
            <li><a href="#Social">Social</a></li>
            <li><a href="#About">About</a></li>
            <li><a href="#Extra2">Extra2</a></li>
            <li><a href="#Contact">Contact</a></li>
        </ul>

    </div>
    </div>
    <!--EOF:navigation-->
</div>
```

Using the Superfish Version of the menu

If the Superfish version of the menu is preferred (note this has been prestyled) Go to your Drupal Install and go to Sites-> All -> Themes -> Bluemasters 7 -> page--front.tpl.php (WARNING YOU WILL NEED A TEXT EDITOR TO PROPERLY IMPLEMENT THESE CHANGES) navigate to <div id="navigation"> delete from line 55 to 67 and paste this in its place

```
<?php if ($page['navigation']) :?>              <?php print
drupal_render($page['navigation']); ?>               <?php else :              if
(module_exists('i18n_menu')) {              $main_menu_tree =
i18n_menu_translated_tree(variable_get('menu_main_links_source', 'main-menu'));
} else { $main_menu_tree = menu_tree(variable_get('menu_main_links_source',
'main-menu')); }              print drupal_render($main_menu_tree);              endif;
?>              </div>
```

Implementing the Flexslider

The skin came with a default slider which was removed but can easily be re-implemented (note this has not been styled) Go to your Drupal Install and go to Sites-> All -> Themes -> Bluemasters 7 -> page--front.tpl.php (WARNING YOU WILL NEED A TEXT EDITOR TO PROPERLY IMPLEMENT THESE CHANGES) navigate to the line that says <div id= "banner"> and paste in the following code:

```
 <div id="banner">
        <?php print render($page['banner']); ?>

        <?php if (theme_get_setting('slideshow_display','bluemasters')): ?>

        <!--#slideshow-->
        <div id="slideshow">

        <div class="flexslider">
        <ul class="slides">

        <!-- slider-item -->
        <li class="slider-item">
        <div class="slider-item-image">
        <a href="<?php print url('node/3'); ?>"><img src="<?php print base_path()
. drupal_get_path('theme', 'bluemasters') . '/images/slide-image-3.jpg'; ?>"></a>
        </div>
        <div class="slider-item-caption">About Bluemasters</div>
        </li>
        <!-- EOF: slider-item -->

        <!-- slider-item -->
        <li class="slider-item">
        <div class="slider-item-image">
```

```
        <a href="<?php print url('node/2'); ?>"><img src="<?php print base_path()
. drupal_get_path('theme', 'bluemasters') . '/images/slide-image-2.jpg'; ?>"></a>
        </div>
        <div class="slider-item-caption">Our Portfolio</div>
        </li>
        <!-- EOF: slider-item -->

        <!-- slider-item -->
        <li class="slider-item">
        <div class="slider-item-image">
        <a href="<?php print url('node/1'); ?>"><img src="<?php print base_path()
. drupal_get_path('theme', 'bluemasters') . '/images/slide-image-1.jpg'; ?>"></a>
        </div>
        <div class="slider-item-caption">Creation of Beaches</div>
        </li>
        <!-- EOF: slider-item -->

        </ul>
        </div>

        </div>
        <!--EOF:#slideshow-->

        <?php endif; ?>

        </div>
```
